

Best Mcx tips provider

HNI service is a highly personalized service with a one-to-one contact with the client. Every HNI client is assigned an experienced Relationship Manager, through whom the calls and updates are given to the client. The medium of the calls are through a direct telephone call to the HNI client by the concerned Relationship Manager. The client is most welcome to ask query(s) about their existing portfolio and get the analysts view on the market.

There is a separate service for HNI Equity and HNI Commodity and the client has the option of availing either or both the services.

The HNI client is advised regarding the quantity of shares/lots to be purchased/sold at the given level and the level at which the profit is to be booked by his /her Relationship Manager. As the calls are filtered after a lot of efforts put by the team of experienced analysts the numbers of calls are less but the accuracy level is very high.
